& B12

About HUMILK

Hu-milk is a **sustainable, ethical** source of dairy freshly squeezed from the lactating breasts of our specially selected human women.

Hu-milk is made without the forced impregnation of non-consenting dairy cows. It's kidnap-free, slaughter-free and therefore guilt-free.

All of our lactating women are fit and healthy, with regular medical checks and their creamy breast milk is Grade A sustainably certified. It is an excellent source of **protein, calcium, iron** and **B12**.

Please try our range of earth positive, humanely-sourced, breast milk products including; our original freshly squeezed breast milk, specially formulated breast cheese and our fruity sweet, breast milk yoghurt.

Here at *Hu-milk* we plan to deliver our nutritious product worldwide and make exploiting and killing cows and calves for milk, a thing of the past.
